

Safe Cave Diving with Swiss Cave Diving

Training manual "Höhlentauchen" for courses

With this manual, the authors, both Cave Diving Staff Instructors of SCD, resp. CMAS.CH and well known for their annual "Stages Spéléo Suisses" in France, present their decade-long experience in the cave diving area with over 500 certified students and over 10'000 accident-free training dives in very condensed form to the interested diving public.

This manual is the official training aid for cave diving of **SCD** and CMAS.CH, the Swiss CMAS sport diving instructor organisation and full voting member of CMAS International. Since 2009 this manual has been officially recommended by CMAS International.

The authors:

Fritz Schatzmann
