

## CCR use during SCD cave diving training courses

Dear Student

You signed up for a cave diving training course von Swiss Cave Diving and wish to use your personal CCR during this time.

Thank you for the trust you gave us. You may already have received all standard registration documents (or you receive them together with this sheet), so please fill them dutifully out and send them back to the course administration.

It must be reminded once more that all types of SC, CC or OC devices are covered by the **European Directive 2016/425 on PSE** (Personal Safety Equipment), which is also valid in Switzerland. In Switzerland, this directive is enforced under the **Act on the Safety of Products, PrSG SR 930.11** and its corresponding ordnance **PrSV SR 930.111**, in the "**Act on Safety of Technical Facilities and Equipment**", **STEG, SR 819.1** as well as the related ordnance **STEV, SR 819.11**.

Diving apparatus', whether OC, SC or CC fall into **PSE Category III**, and are not entitled to be put on the market without prior CE Declaration of Conformity. The technical verification for CCR only is executed under **SN EN 14143** (harmonized European Testnorm for "**Respiratory Equipment – Self-contained re-breathing apparatus**") and has been also integrated into CH-legislation).

In order to give all necessary technical information to the course director right in time, we kindly ask you to provide the data required below. This data-sheet is an integral part of your registration documentation.

Manufacturer:		
Model/Trade name:		
Serial-No.:		
Declaration of CE-Conformity (No of certifying body):		( <del>C</del>
Type of CCR governing design (eCCR, mCCR, hCCR, other):		
Scrubber CO2 absorbent time acc. SN EN 14143 (manufact. data):		
Manufacturer-authorized absorber material to be used:		
Offboard/offline OC-bailout system (EN250:2010) to be used: (Number of tanks / Tank size / Filling pressure / EANx-compatibility)		
Minimum/maximum temperature for use (manufact. data):		°C /°C
CCR training dependent authorized diluent gases /max. depth:		/ m
Is there any complete user-manual available?		yes no
I fulfill ALL other prerequisites for the use of CCR specified above:  yes  no  (50 dives->HT1 / 100 dives->HT2 OW experience with CCR, CCR-training certificate)		
The undersigned certifies to have fully understood the legal backgrounds and that all the above information is accurate, provided to the best of his/her knowledge and truthfully given.		
Place/Date: .	Signa	iture:
ttachments: Copy of Declaration of Conformity / Confirmation by manufacturer (facultative, if CE-No provided)  Copy of training certificate from manufacturer or authorized training center/instructor  Copy of Pre-Dive Checklist provided by manufacturer
