

Mitteilung zur Website caveconditions

You may have already heard about our website www.caveconditions.com and many of you are already reporting quite regularly which is awesome. Until now we had a problem that many cavedives were done but not all of the conditions were reported. Mostly because it got forgotten until the diver got home. I have developed an iPhone app called "CaveInfo" which synchronize all the data with the website and allows reporting offline directly onsite. It can be uploaded later at home. It offers many features such as

- Browse / Search for caves
- Get detailed cave information
- See latest conditions
- Browse caves on map
- Navigate to the caves
- Report conditions offline / online
- Use the app completely offline
- See condition statistics of each cave

Of course the data delivered relies on the information I get from all the users. Many divers are already reporting quite a lot of cave details which I will put into the database. If you can contribute on conditions or even on cave details I would be very happy if you could send me these to info@caveconditions.com. Information we are looking for:

Cave

Region

Country

Latitude

Longitude

Description of the cave

Important Information such as if it is on private land, if it needs special permissions or if diving in that cave is prohibited etc.

Images of the cave

Cave maps

Lat/Lon of the nearest parking

Not all information will be displayed yet but will come in the future.

You can find more information on our website

<http://www.caveconditions.com/ios.php>

If you find any bugs, have feedback or anything else please feel free to send me an email to christian.sandrini@me.com
